Patient information

Vascular Laboratory at The Royal London Hospital

You have been given an appointment in the vascular laboratory at Royal London Hospital for a vascular ultrasound test. This leaflet explains what the test involves.

Why do I need a vascular laboratory test?

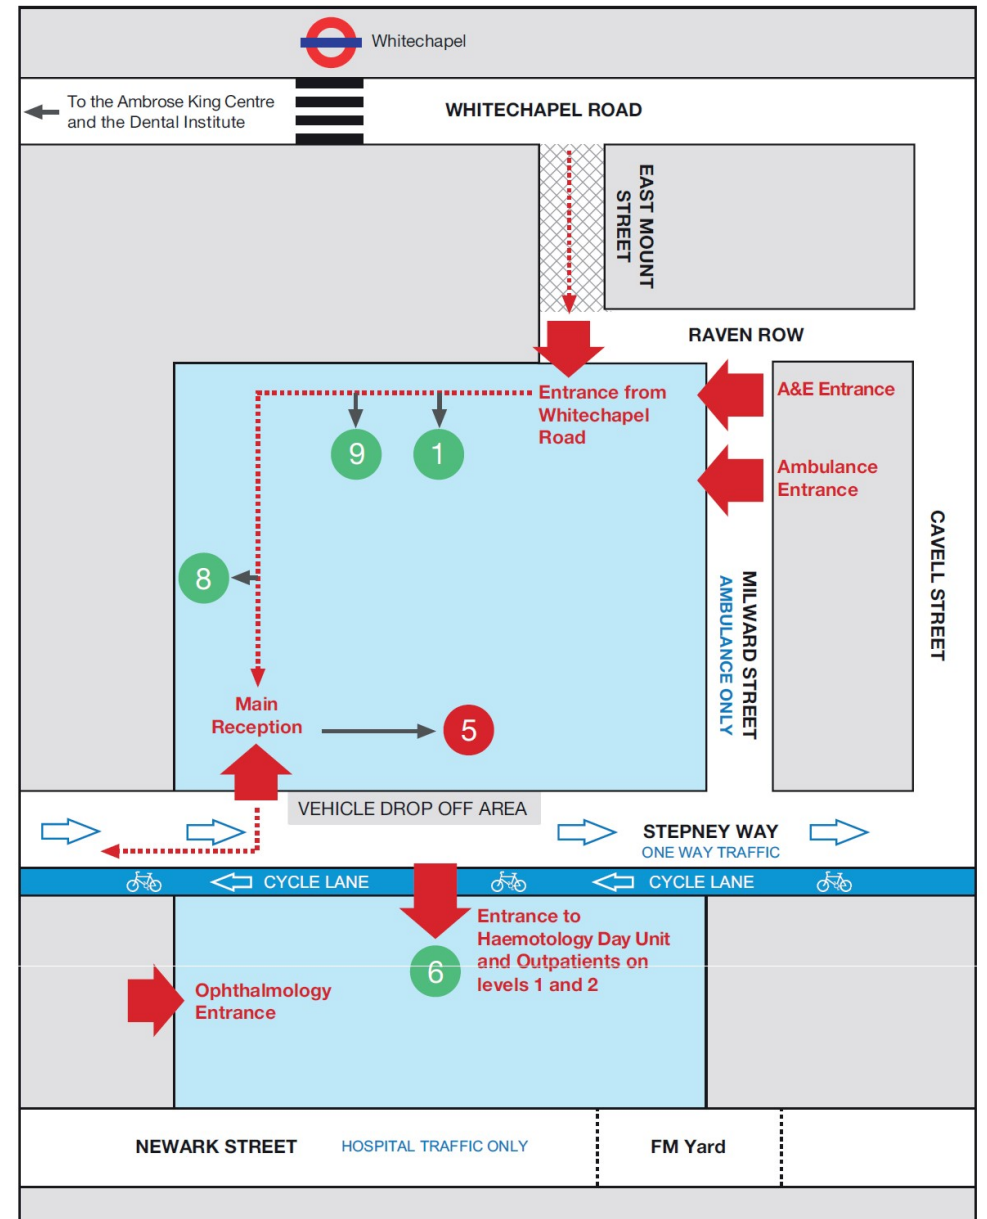

The test has been requested by a hospital doctor to help diagnose your condition and plan your treatment. Staff will explain the procedure to you and answer any questions that you may have.

What type of tests will I have?

The test is usually an ultrasound scan in which special attention is paid to the blood vessels. The scan is sometimes called a 'duplex ultrasound' or 'doppler ultrasound scan'. The vessels most commonly examined are the arteries or veins in the neck, arms, legs or abdomen.

Another test uses ultrasound and blood pressure cuffs to measure blood pressure in the arms and legs. You may also be asked to exercise on a treadmill for up to five minutes at a speed you are happy with.

Ultrasound machine

- 1 Lift core 1 - Lifts to the Renal Institute on floor 9
 - 9 Lift core 9 - Lifts to the Women's Centre and Children's Hospital on floors 6 to 8
 - 8 Lift core 8 - Lifts to outpatients on floors 1 and 2 and day and short stay surgery on floor 3
 - 5 Lift core 5 - Main visitor lifts to wards and the restaurant
 - 6 Lift core 6 - Lifts to outpatients on floors 1 and 2
- Pedestrian Access Only
 Traffic Direction
- Pedestrian access to existing Outpatients Department

Your health records

To enable us to improve the quality of the care that we provide, your health records are kept by the Trust and may be used for teaching, training, audit and research. Further information on how the Trust uses your information can be found on our website at

What will happen during the test?

During the ultrasound scan you will either lie or sit on a couch, or stand on a stool. The room will be partially darkened to enable the person performing the scan to see the monitor. You will be asked to partially undress to allow the area of interest to be scanned.

A clear, water-soluble gel is put on the skin and an ultrasound probe is slid over the skin of the area to be examined. The instrument causes no pain. The examination normally takes between 20 and 60 minutes and you may be asked to change positions during the scan.

Do I need to prepare for the test?

There is no preparation for these tests. You can eat and drink as normal.

Are there any risks involved?

There are no known risks accompanying the ultrasound examinations performed within the vascular laboratory.

Who will perform the test?

A clinical vascular scientist, trained in the use of medical ultrasound, will perform your test. Other staff may be present, and the test may be checked by another member of staff. There are no medical doctors working in the lab. The hospital doctor who made the request will explain the results and clinical implications of your test to you when you next see them.

You do not have to be accompanied to your appointment, however you may have somebody with you if you wish.

What happens to the results of the test?

The test results will be stored in your hospital records. If your test was requested by a doctor within the Trust, they will be able to access your results electronically. If a doctor from another hospital requested your test, we will usually send the results electronically to them.

How to contact us

If you cannot attend or need more information before or after the test, please contact the vascular laboratory on 020 3594 1076 as soon as possible to arrange another appointment.

Our administration address is:

Vascular Lab
1st Floor (Imaging)
Royal London Hospital
London E1 1BB

Tel: 020 3594 1076
Fax: 020 3594 3224

Where is the vascular laboratory at The Royal London Hospital?

The vascular lab is located on the first floor of the new hospital. Once you have entered the building follow the signs to lift core 8 and take a lift to the first floor.

You will see signs for Outpatient Imaging (X-ray). The reception desk is immediately outside the lift area on the first floor.

Getting to The Royal London Hospital:

Tube: Whitechapel underground station is opposite the hospital's main entrance via East Mount Street. The following tube lines run to Whitechapel tube station: the Hammersmith and City line, District line and the London Overground (East London line).

Buses: Buses that stop outside or close to the hospital on Whitechapel Road:
25, 106, 205, 253, 254
Buses that stop close to the hospital on Commercial Road:
15, 115, D3
Night buses: N25, N106, N253

Low-floor wheelchair accessible buses run on all routes serving The Royal London Hospital.

Drop off point for taxis and cars:

Please use the vehicle drop off area on Stepney Way

Parking: There is no public parking at the hospital but there is limited metered parking in surrounding streets.
